Skills

Hard Skills
JavaScript, TypeScript, Svelte, SvelteKit, React, Git, GitHub, MongoDB, HTML, CSS, Colyseus, Express, Axios

Soft Skills
Able to take feedback and apply it practically, eager to learn, can work independently, both verbal and written communication skills, and team oriented.

Career Objective

Self motivated account manager with problem solving and optimization skills seeking to transition into a junior software development role. Eager to contribute strong interpersonal skills and programming experience to take extra work off of more senior engineer's plates and increase your software engineering team's productivity.

Projects

Chess Game and Website - June 2023 - present
Built a fully functioning responsive chess game from scratch that enables users to play real time chess games over the internet.
Completed migration of the entire application from JavaScript and Web Components to Svelte and TypeScript.
Worked with a senior developer for architectural design and code reviews. Utilized GitHub for branching and pull requests and applied feedback to code.

Sales Cycle Tracking App - May 2023 - June 2023
Built a sales opportunity track to keep track of sales stages and format sales opportunities in a way not supported by current company solutions.
Responsive design, login functionality, and connects to MongoDB to persist opportunity information.

Script Organizer App - June 2023
Built a tool to write and display scripts for short skits. Enables users to easily know which scripts or scenes have already been filmed and can filter based on preferences.
Built with React, JavaScript, and connects to a local lightweight static JSON backend to allow users to access scripts without the internet.

Experience

1WorldSync / Customer Success Representative - August 2021 - present, Chicago
Managed 700 active customers and their accounts including upselling additional services.

Jobspring / Talent Advisor - August 2021 - present, Chicago
Sourced IT Infrastructure engineers to place in hard-to-fill roles
